

ROHIT MEHRA

Full Stack Developer — React.js | .NET Core | SQL Server | 5+ Years Experience

Nagpur, Maharashtra, India | +91 91721 96379 | officialrohitmehramb@gmail.com | [linkedin.com/in/dev-rohitmehra](https://www.linkedin.com/in/dev-rohitmehra) | rohitmehra.com

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building enterprise web applications using React.js, TypeScript, ASP.NET Core, C#, and SQL Server. Skilled in designing scalable RESTful APIs, optimizing SQL Server databases and stored procedures, and delivering responsive, production-grade user interfaces end to end. Experienced across the full SDLC in Agile/Scrum environments — from requirement analysis and architecture through deployment and production support — with additional exposure to Blazor, .NET MAUI, and role-based authentication (RBAC).

KEY SKILLS

Frontend: React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Blazor

Backend: .NET Core, ASP.NET Core, ASP.NET MVC, C#, RESTful API / Web API design, .NET MAUI, VB.NET

Database: SQL Server, MySQL, SQLite, Entity Framework, Dapper, Stored Procedures, Query Optimization

Tools & Practices: Git, GitHub, GitLab, Azure DevOps, Jira, Postman, Swagger, IIS, Agile/Scrum, SOLID Principles, OOP, RBAC, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Full Stack Developer | *Paramaya Technology Services Pvt. Ltd.*

Jun 2023 – Present

- Developed enterprise web applications end-to-end using React.js, TypeScript, ASP.NET Core, C#, SQL Server, and Dapper, taking ownership from design through production deployment.
- Designed and built secure RESTful APIs, optimizing SQL queries, stored procedures, and overall database performance.
- Built reusable, responsive React.js components and UI patterns adopted across multiple production applications.
- Implemented authentication and Role-Based Access Control (RBAC) to secure application access across user roles.
- Engineered reporting modules capable of exporting 100,000+ records without performance degradation.
- Delivered 6 full-stack production applications — SmartOffice, Astrology Platform, Employee Management System, Logistics Management System, College Management System, and MAO — from design through deployment.
- Managed production deployments and hosting using IIS, Plesk, Hostinger, and Namecheap.
- Collaborated in Agile/Scrum teams using Azure DevOps and Jira, providing ongoing production support and issue resolution.

.NET Developer | *Saklani Brothers Infotech*

Dec 2020 – Feb 2023

- Developed web and desktop applications using ASP.NET, Blazor, VB.NET, and .NET MAUI.
- Built ERP and Expense Management applications backed by SQL Server and SQLite.
- Developed and integrated RESTful APIs with backend services to support core business workflows.
- Optimized SQL queries and database structures, improving overall application performance.
- Participated in requirement analysis, testing, deployment, and ongoing maintenance across the full SDLC.

SELECTED PROJECTS

- SmartOffice:** Enterprise office management platform — React.js, ASP.NET Core, SQL Server; secure REST APIs, responsive UI, optimized database layer.
- Logistics Management System:** Real-time shipment tracking, inventory management, reporting, and operational dashboards.
- Employee Management System (HRMS):** Attendance tracking, payroll processing, user management, and role-based access control.
- College Management System:** College ERP covering admissions, student records, faculty management, and academic administration.
- MAO Application:** Cross-platform web, desktop, and mobile app sharing unified business logic via a common REST API.

EDUCATION & LANGUAGES

Bachelor of Computer Applications (BCA) — Adesh University

Languages: English (Professional), Hindi (Native)
